# Honorary Tree

---

**Trees have a place along sidewalks, in parks, in your backyard, and on your campus—and give back so much to the world in the same way that your favorite teacher, mother, father, brother, sister, friend and mentor each have given so much to your life. These individuals may have contributed to your degree or helped you with a job or lent you advice...**

**Why not take the time to honor them by naming a tree planting or existing tree after them? Trees live to give back to their community and the world around them.**

**Plantmapper.com allows you to create a beautiful certificate displaying the name, location and the individual to be honored without undermining the beauty of the place with lots of tree tags and hundreds of plaques.**

**Also consider creating a program to raise money for your school, campus or organization. For each certificate printed you pay PlantMapper.com a small fee—and keep the vast majority of dollars to plant additional trees, and maintain & protect your current plantings.**

*Additionally, our cell phone feature allows you to take photographs and document a tree's features while roaming your garden. (That's right: most cataloging can be done in the field.)*

*The fun part about PlantMapper.com is that after you are done you can send a link to all your family and friends, with just a click of a button.*

**Come join us on PlantMapper.com to begin your mapping journey today.**
